About Me

Kia ora, I'm Jaelyn Lee, a software developer with a keen eye for detail and a goal-oriented mindset. I thrive on challenges and am always seeking to improve.

I possess a strong understanding of **TypeScript, React, Redux, and SQLite** technologies. Throughout my time at the Dev Academy, I have gained valuable experience in various programs, such as Friday group projects, multi-day projects, and personal challenges, which have helped me develop my technical skills and teamwork abilities. Additionally, I have strengthened my soft skills to communicate effectively with co-workers and maintain a positive work environment.

I am excited to take on new challenges in my career and contribute to the success of my team and organisation.

Experience

Dev Academy Aotearoa / Student - Software Development Bootcamp

Aug 2021 - Mar 2023, Auckland, New Zealand

This was a 17-week full immersion software development boot camp that mimics a real-life development team as closely as possible. I learnt new technologies while working in pairs and teams using the Agile methodology. One of my strengths is enhanced awareness and empathy, which I developed through extensive soft skills training and discussions at Dev Academy.

- Skills acquired: TypeScript, React, Redux, Node.js, Vitest, and SQLite (with Knex)

Operations and Logistics Officer / Operations & Logistics Officer

Aug 2021 - Mar 2023, Auckland, New Zealand

I oversaw data-related tasks such as container import and export, inventory management, and warehouse coordination. I also worked with the accounting team on customs, product costs, and exchange rates.

- Skills acquired: Data management, cross-border logistics, inventory management, and warehouse coordination

Stolen Summer / Cashier and cafe associate

Feb 2020 - Aug 2021, Auckland, New Zealand

I learnt customer service and communication skills, memorised 400+ orders and names, and developed problem-solving skills in high-stress situations.

- Skills acquired: problem-solving, working well under pressure, and data management.

Education

Dev Academy Aotearoa / New Zealand Certificate in Applied Software Development
March 2023 - July 2023, Auckland, New Zealand

New Zealand School of Education / Diploma in Business Level 7, Business Administration and Management, General
Oct 2019 - Aug 2020, Auckland, New Zealand

Hanyang Women's University / Associate's degree, Human Resources Management/Personnel Administration, General
Mar 2015 - Feb 2017, Seoul, South Korea

Projects

Neighbours / TypeScript, React.js, React Query, SQLite, Tailwind

This is a social app that can only be used within your neighbourhood. Users can check the latest news, weather, activities, and marketplace. I worked on front-end development and styling, and I worked on front-end functionality to display data from the database and created a UI component for duplicative components, such as buttons or posts, to prevent writing repetitive code.

Through this project, I gained experience in agile methodology using a ticketing system and handling complex data structures.

Pinkeye Quiz Master / TypeScript, React.js, Redux, SQLite

This is a simple quiz app with an arcade theme and funny sound effects to interact with users. I worked on the front-end part, rendering the quiz to the page and defining the conditions for correct and incorrect answers.

Through this project, I gained a clear understanding of the functionality related to the front end and the data retrieval of the back end.
